Poaching is a serious crime, and it has a devastating impact on wildlife populations around the world. Elephants are being killed for their ivory, rhinos are being killed for their horns, and tigers are being killed for their fur. These animals are facing extinction, and if we do not act now, they will be gone forever.

Wasserman's book is a call to action. He shows us that poaching is not just a problem for faraway countries - it is a global problem that affects us all. He challenges us to think about our own consumption habits, and to make choices that support wildlife conservation.

Poacher Justice is a powerful book that will change the way you think about wildlife conservation. It is a must-read for anyone who cares about animals, and for anyone who wants to make a difference in the fight against poaching.
